SeungMin (Robin) Lee

1225 W 1000 S Apt C324 Orem, Utah, 84058 | 770.668.0544 | Seungmin.Lee@Live.com | US Citizen

Summary

Enthusiastic Python programmer with experience in developing scripts for research, internal workflow automations, and free time projects. Strive to develop innovative solutions to difficult problems with all tools available. Cursory work with both frontend and backend development, with readiness to develop deeper knowledge and skills.

Education

Georgia Institute of Technology, Atlanta, GA **August 2015 - May 2019**

- Bachelor of Science in Materials Science and Engineering
- Minor in Physics
- Graduated with Highest Honors

Research & Work Experience

Junior Software Test Engineer **March 2021 - Present**

Qualtrics – SAP, Provo, UT

- Testing functionality of internal Salesforce instance
- TestRail automation tools for generating necessary biweekly updates to TestRail Milestones
- TestRail historical testing data management to review for automated testing

Product Specialist **November 2019 - March 2021**

Qualtrics – SAP, Provo, UT

- Certified in XM Qualtrics Platform
- Specialized in 360 Platform
- Mentored a new member of the team, who has been recognized for high productivity after working 2 months
- Recognized by peers for intricate and complex solutions with XM Platform
- Proposed method for developing IP Address restricted survey responses for survey protection

Undergraduate Researcher and Advisor **October 2016 - July 2019**

Georgia Institute of Technology Computational NanoBio Tech Lab, Atlanta GA

- Investigated micelle and polymer miscibility with molecular dynamic simulations for the Department of Energy
- Presented reactant transport through micelles at poster session at AICHE conference
- Published 4 papers with one first author credit
- Studied transport of reactants with dissipative particle dynamics
- Trained and led team of junior students on research equipment and techniques
- Wrote technical manuals for future grad/undergrad students to follow

Projects

Work Flow Automations Team **June 2020 - July 2020**

- Developed Regression tagging on Resolution Team's pulses to increase tracking and prioritizing of issues sent to Eng
- Implemented modifications to place OOO Clinic tickets into the main queue for quicker responses on internal issues
- Completed certifications to work on Propriety Workflow codebase (Odo QBadge)

Skills

Programming: Python 2, JavaScript, Java, Linux, Html/CSS, MatLab, Regex, PHP, and VBA
Software: Solidworks, Cerius2, Material Studios, and Microsoft Suite
Languages: Fluent in English; conversational in Korean
