

Robin's Quarterly Review

Submit to Manager

My Name	My Manager
Robin Lee	Donny Amalo

Quarter: Q1 2024

My Personal Ratings Assessment

Met Expectations

My Accomplishments

Accomplishment	Related OKR(s)	Details
Documentation of QR / ACV process and calculations	QR and ACV Calculations will be trued up to business need	Stakeholders/business leaders are and how it should be calculated. I created a coda document that wa https://coda.io/d/SFDC-Team-Wiki This will be used to help communic future conversations around “fixing

Comparison of Old CPQ and New CPQ functionality	QR and ACV Calculations will be trued up to business need	We were seeing gaps of functional Review of our old CPQ calculations over and functionality that we adop exit rate, which was a major dis This is laying the ground work for c
Analyze and Reduce Support Cases	The team will catch up on tech design for bugs in the backlog	Our team saw a large influx of supp constraints of support, not a lot of Sasha, Sophia, and I recorded, revi frequent support issues. The tickets created have potential further address repeating issues.
Tech Design and Scoping Contract Data issues	The team will catch up on tech design for bugs in the backlog	We had a couple data integrity issu contracts is not aligned amongst s impacts Renewal data and significa around 800 contracts) Doing a data analysis and scoping, This lays the groundwork for the d system.

My Learnings

What I learned this quarter	What actions have I taken/will take related to this learning
Scott (previously QE) has automated tests that seem to be able to provide a level of test coverage of QCP (something Apex struggles to cover)	I will need to look into what the lift might be for our team to adopt automated testing coverage. It looks like a promising way to storing the testing scenarios Finance would like to test before approving changes.
Our Salesforce CPQ system currently relies on many series of asynchronous operations for automations for our custom code, but in testing, we are finding gaps where the async operations fail to run at the correct time.	I have moved some of these async operations to QCP, so that the automation (usually in renewal quote scenarios). And I will be further tech designing more to run in QCP.

My Career Goals (Set 2-3 goals for the upcoming quarter)

What I want to accomplish	How I plan to accomplish it	Status	Quarter

Learn and implement ChatGPT in our support intake process	McKay Berndt had a plan to implement ChatGPT in intake of support requests to Deal Desk, but it was tabled due to de-prioritization. I want to spend some time learning what we had and if there's something that I am able to contribute to the project's development.	Not started	Q1 2024
Practice Tests and Training for Platform Developer Certification	~~Plan on setting aside time in the morning each day to focus time on learning.~~ 1. Spend 5-20 minutes each morning on focus on force. Take Notes. 2. Quick review at end of the day. 3. Prep for practice exam 4. Schedule real exam	In progress	Q1 2024 Q2 2024
