My Accomplishments

Accomplishment	Related OKR(s)	Details
Migrating our quote automations from asynchronous Apex logic to QCP Javascript, these fields now update immediately after the user saves the quote.	Migrate Asynchronous Apex to QCP	• **Reduced Update Delays**: Prev Quote Configuration, Quote Ty • **Manual Override Capability**: I automation. Reducing the nee • **Enhanced Downstream Autor** order form generation. • **Reduced False Positive Bug R** a smoother and more reliable
Identified and rectified the issue where renewals were mistakenly generated for Research Services and Free Trial opportunities.	QR/ACV Re-vamp project	• **Streamlined Process**: Eliminat communications. • **Reduced Renewals Team Wor** as a workaround. They can no • **Ensured Correct Data**: Cleane existent renewals.

Lay groundwork for Quota Relief and ACV fixes	QR/ACV Re-vamp project	• **Prioritized Issues**: Focused or particularly around amendmer • **Corrected Calculations**: Reco manual recalculations on quot • **Improved Internal Communic** about ACV/QR. • **Ongoing Discussions**: Contin system level.

My Learnings

What I learned this quarter	What actions have I taken/will take related to this learning
Getting a consensus on how ACV and QR should work has been difficult. (Business Need vs System Limitations)	Further discussions with the Crediting team have provided detailed insights in requirements for calculating QR and ACV. These requirements reveal limitatior infrastructure, indicating that substantial changes will be necessary to suppor functionality. However, these requirements hinder future ability to make adjus adjustments are necessary. I have initiated discussions with the Crediting team to explore whether change could accommodate the issues I foresee with their request. We are continuing determine if there is a simpler method for the requested calculations or if a pc necessary.
I learned that pain points and issues voiced by stakeholder teams, such as the Crediting team and Deal Desk, often went unaddressed through regular bug tickets or a workaround was used.	The tickets for the QR/ACV project were designed with stakeholder pain point future development could address these issues. Additionally, I created a few s tackle some of these pain points, helping to reduce the time stakeholders nee

My Career Goals (Set 2-3 goals for the upcoming quarter)

What I want to accomplish	How I plan to accomplish it	Status	Quarter
Practice Tests and Training for Platform Developer Certification	~~Plan on setting aside time in the morning each day to focus time on learning.~~ 1. Spend 5-20 minutes each morning on focus on force. Take Notes. 2. Quick review at end of the day. 3. Prep for practice exam 4. Schedule real exam	In progress	Q1 2024 Q2 2024
Develop a tool that can be useful for both developers and sales reps, alike. Primarily around the visualization and calculation of QR/ACV.	~~First we need to simplify the complexity of QR/ACV calculations to be easily understandable, with minimal text.~~ Then, create a reporting tool to show how a quote's ACV/QR are calculated. This should be accessible for general users (Reps) summarize their ACV/QR, power users (crediting team) to correct values, and admins.	In progress	Q2 2024
