My Learnings

What I learned this quarter	What actions have I taken/will take related to this learning
More about the OOTB functionality of CPQ	It's lead me to evaluate some of our design choices, particularly those that we ATG's implementation. I would like to invest more time in exploring how other teams approach solutio CPQ. The first step could involve engaging in Trailhead trainings to build a solid four I think the next steps could be to speak with other developers in conferences our new-hire, as the complexity of the problems we're trying to solve are not a base Trailheads.

My Career Goals (Set 2-3 goals for the upcoming quarter)

What I want to accomplish	How I plan to accomplish it	Status	Quarter
Improve Documentation Writing	I want to begin by completing the documentation for the QR/ACV functionality. Making any updates to the documentation since my last update. I'll focus on two strategies to improve documentation writing: first, I'll provide clear explanations for why certain functions exist and less about the actual functionality. Second, I'll start a changelog that incorporates JIRA tickets, ensuring that recent changes are well-documented and easily understandable.	Not started	Q4 2024
Improve my quarterly review writing and documenation	Start by more regularly documentating my accomplishments (instead of at the end of the quarter). Also, check in on the status of goals set at the beginning of the quarter more regularly.	Not started	Q4 2024
