Rapid Deployment of Qualtrics AI Trial Sign-Up Initiative

Summary

- Assisted in the rapid, last-minu
  ups for trialing Qualtrics' AI fea
- Collaborated closely with Dom
  need for new development fro

Impact

- Accelerated deployment timeli
- Generated significant client int
  months of launch.

Consulted on AI-Based Migration of Deal Desk and Legal Team Request Help Surveys	• Served as a key technical cons Request Help Surveys to a nev • Provided in-depth knowledge transition and alignment with b • Helped identify potential risks

My Learnings

What I learned this quarter	What actions have I taken/will take related to this learning
Building Alignment with Qualtrics' Interview Evaluation Standards	While shadowing technical interviews this quarter, I realized that my evaluatio architectural responses were more lenient than perhaps expected. The rubric' architectural competence felt somewhat subjective, making it challenging to g definitively right or wrong. This experience helped me recognize the nuances senior technical skills. Moving forward, I plan to shadow more experienced interviewers to better un Qualtrics' interview standards and expectations. This will help me develop a m consistent approach to candidate assessments.
Enhanced Decision-Making for Sustainable Solution Architecture	This project also highlighted that migrations to out-of-the-box (OOTB) solutio with thorough upfront analysis due to the extensive downstream dependencie interactions involved. Understanding the full scope of how OOTB features inte processes is critical to avoid unexpected complexity and scope creep. Moreover, this experience has strengthened my ability to evaluate when custo add value versus when they introduce disproportionate development and mai Gaining this perspective empowers me to more confidently push back on stak may not be sustainable long-term, advocating for simpler, more maintainable s

My Career Goals (Set 2-3 goals for the upcoming quarter)

What I want to accomplish	How I plan to accomplish it	Status	Quarter
Complete Training and Shadowing for Interviewing	Allocate some time at the end of sprints and make sure Ethan is aware that I am ready to do shadowing for interviews.	Done	Q1 2025 Q2 2025
Improve Documentation	Automation documentation is a very iterative process that takes a long time to do and it is hard to maintain, especially given our team's speed of development. I would like to work on strategizing documentation for my parts of Deloitte Implementation and continue work on the ACV/QR documentation.	In progress	Q1 2025 Q2 2025
Certification for Dev 1	Schedule regular time to review and study material every week. Take monthly practice exams to monitor progress	In progress	Q2 2025 Q3 2025
